

Preserve the comparison with less detail

15 families screened / Seven eligible choices / One displayed recommendation

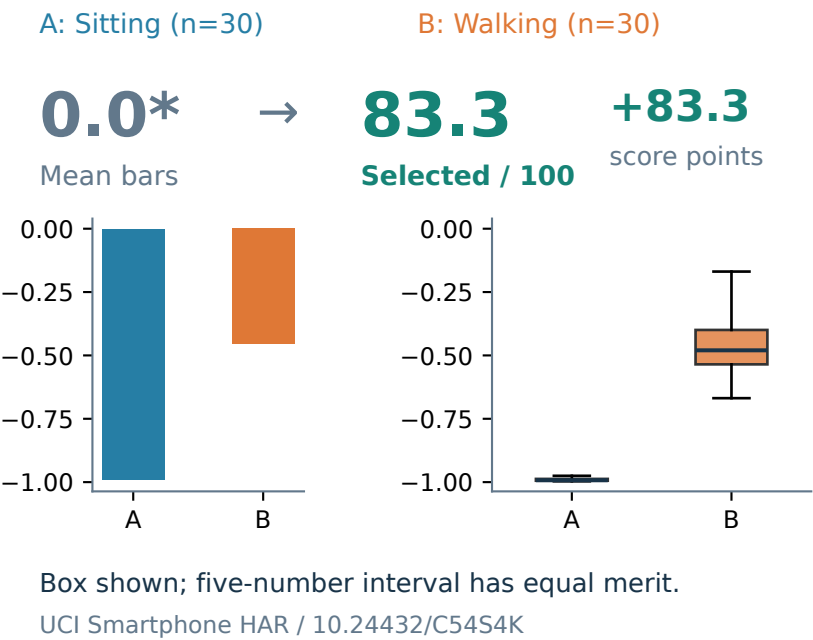

a Breast tumour data / Radius standard error

	ORDER / ELIGIBLE CHART	E / τ	SCORE	SIZE
1	Histogram / 8 bins	0.348	96.8	18
2	Heatmap / 8 bins	0.348	96.8	18
3	Violin plot / 16 grid	0.610	94.0	34
4	Dot plot / raw	0.000	0.0	569
5	Bar chart	2.018	0.0*	2
6	Box plot	5.699	0.0*	10
7	Interval plot / five-number	5.699	0.0*	10

Green: displayed choice. $E / \tau \leq 1$ meets tolerance.
Exact numerical ties use declared catalogue order.

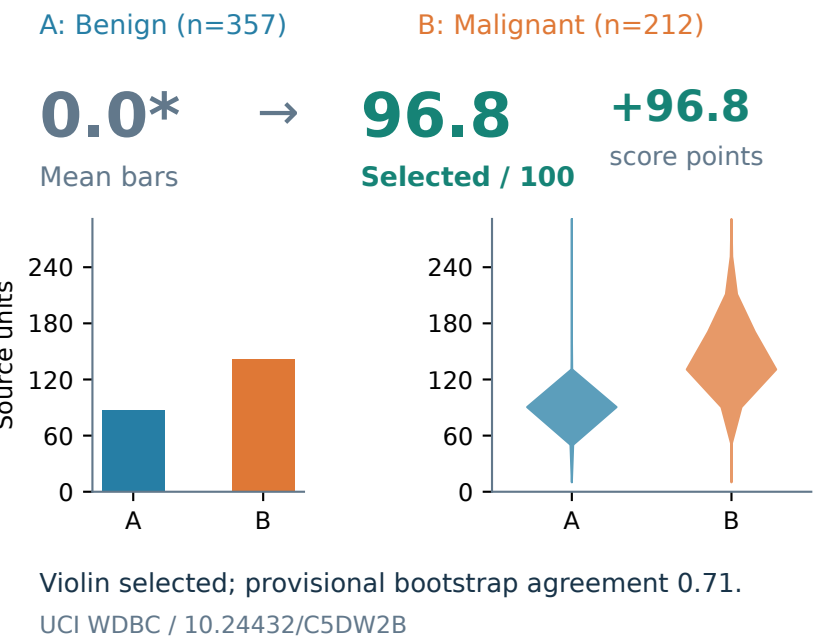

b Smartphone activity data / Gyroscope-jerk variability, z axis

	ORDER / ELIGIBLE CHART	E / τ	SCORE	SIZE
1	Box plot	0.164	83.3	10
2	Interval plot / five-number	0.164	83.3	10
3	Histogram / 8 bins	0.547	70.0	18
4	Heatmap / 8 bins	0.547	70.0	18
5	Violin plot / 16 grid	0.369	43.3	34
6	Dot plot / raw	0.000	0.0	60
7	Bar chart	1.445	0.0*	2

Green: displayed choice. $E / \tau \leq 1$ meets tolerance.
Exact numerical ties use declared catalogue order.

c Breast tumour data / Worst perimeter

	ORDER / ELIGIBLE CHART	E / τ	SCORE	SIZE
1	Violin plot / 8 grid	0.378	96.8	18
2	Histogram / 8 bins	0.427	96.8	18
3	Heatmap / 8 bins	0.427	96.8	18
4	Dot plot / raw	0.000	0.0	569
5	Box plot	1.662	0.0*	10
6	Interval plot / five-number	1.662	0.0*	10
7	Bar chart	1.892	0.0*	2

Green: displayed choice. $E / \tau \leq 1$ meets tolerance.
Exact numerical ties use declared catalogue order.

Score: percentage reduction in retained values, credited only when the comparison stays within tolerance.
Raw dots = 0 (no reduction). 0* = does not qualify. Equal positive scores: smaller discrepancy ranks first.
All 15 families are documented in Table S3. Eight other-task families are excluded from these scored tables.
